## Constructing pie charts

---

- 1 36 people were asked: "what do you drink whilst at work". The results will be placed in a pie chart with a total of 12 pre-defined sectors. How many sectors would represent water? Tick **1** correct answer

|       | frequency | sectors |
|-------|-----------|---------|
| total | 36        | 12      |
| water | 21        |         |
| milk  |           | 2       |
| other |           |         |

☐ 21

☐ 63

☐ 12

☐ 7

☐ 2

- 2 36 people were asked: "what do you drink whilst at work". The results will be placed in a pie chart with a total of 12 pre-defined sectors. How many people voted for milk? Fill in the blank

|       | frequency | sectors |
|-------|-----------|---------|
| total | 36        | 12      |
| water | 21        |         |
| milk  |           | 2       |
| other |           |         |

- 3 A large set of information is collected and represented in a pie chart of 20 equally-sized sectors. Each one sector represents a frequency of 45. What is the total frequency of this dataset? Fill in the blank

\_\_\_\_\_

- 4 The incomplete ratio table shows a dataset being converted into angles to represent each subgroup as sectors on a pie chart. Match the letters to the correct missing values. Write the correct letter in each box

|        | frequency | angle    |
|--------|-----------|----------|
| forest | 17        | 102      |
| river  | 11        | <i>d</i> |
| field  | 18        | <i>e</i> |
| other  | 14        | 84       |
| total  | <i>a</i>  | <i>b</i> |

*c*

|   |   |
|---|---|
| a | a |
| b | b |
| c | c |
| d | d |
| e | e |

|  |     |
|--|-----|
|  | 360 |
|  | 108 |
|  | 60  |
|  | 66  |
|  | 6   |

- 5 Starting with the first step, put these steps for constructing a sector of a pie chart in order. Use numbers to show the correct order

|  |                                                                          |
|--|--------------------------------------------------------------------------|
|  | Plot an × at this point on the protractor.                               |
|  | Draw a straight line from the centre of the circle to its circumference. |
|  | Remove your protractor.                                                  |
|  | Line the 0° on the protractor with the most recent straight line drawn.  |
|  | Starting from 0°, find the angle you want to draw on the protractor.     |
|  | Draw a straight line from centre of the circle through the × you plot.   |
|  | Line the bottom centre of the protractor with the centre of the circle.  |

- 6 The incomplete ratio table shows a dataset being converted into angles to represent each subgroup as sectors on a pie chart. Find the value of angle  $a$ , in degrees. Fill in the blank

|           | frequency | angle |
|-----------|-----------|-------|
| white     | 6         |       |
| wholemeal | 12        |       |
| granary   | 14        | $a$   |
| wraps     | 16        |       |
| total     |           | 360   |

---
