

Constructing pie charts by utilising technology

- 1 Which symbol must be typed into a cell first in order to start any mathematical calculation? Tick **1** correct answer

☐ *

☐ /

☐ ~

☒ =

☐ #

- 2 Match the mathematical operation to the symbol used to represent these operations in a spreadsheet Write the correct letter in each box

a	addition
b	subtraction
c	multiplication
d	division
e	not used for any operation

d	/
c	*
b	-
a	+
e	x

- 3 Which of these spreadsheet functions will correctly calculate 63 add 117 in the cell C3? Tick 2 correct answers

	A	B	C	D
1				
2				
3	63	117		
4				
5				
6				
7				
8				
9				

☒ = sum(A3 : B3)

☐ = 63 plus 117

☒ = A3 + B3

☐ = A3 add B3

☐ 180

- 4 Select the spreadsheet function and answer which correctly show the multiplier being calculated for this ratio table in the cell D17. Tick 1 correct answer

	A	B	C	D
6				
7				
8				
9		colour	frequency	angle
10		purple	24	
11		green	20	
12		blue	36	
13		pink	32	
14		other	8	
15		total	120	
16				
17			multiplier	
18				

☐ 3

☐ $\frac{1}{3}$ or 0.333

☒ =360 / C15

☐ =C15 / 360

☐ =C15 \div 360

- 5 Select the spreadsheet function and answer which correctly shows and updates the angle for Ireland, calculated in the cell N23. The values in the frequency column may be updated. Tick 2 correct answers

	K	L	M	N
20				
21		countries	frequency	angle
22		England	212	
23		Ireland	90	
24		Scotland	146	
25		Wales	128	
26		total	576	
27				
28			multiplier	0.625
29				

56.25

144

= 90 x 0.625

=M23 x N28

= 90 x 0.625

- 6 Match the descriptions with the correct spreadsheet functions and output values for this ratio table written in a spreadsheet. Write the correct letter in each box

	Q	R	S	T
32				
33		outcome	frequency	angle
34		rock	279	
35		paper	234	
36		scissors	297	
37		total		360
38				
39			multiplier	
40				

a	Spreadsheet function for S37
b	Output value for S37
c	Spreadsheet function for T39
d	Output value for T39
e	Spreadsheet function for T34
f	Output value for S34

a	= sum(S34 : S36)
f	124
b	810
e	= S34 * T39
c	= 360 / S37
d	$\frac{4}{9}$ or 0.444
