

Name: _____

Constructing pie charts by utilising technology

- 1 60 people were asked: "what do you most frequently drink whilst at work". The results will be placed in a pie chart with a total of 12 pre-defined sectors. How many sectors would represent water? Tick **1** correct answer

	frequency	sectors
total	60	12
water	40	
milk		3
other		

☐ 4

☐ 5

☐ 6

☐ 7

☐ 8

- 2 60 people were asked: "what do you most frequently drink whilst at work". The results will be placed in a pie chart with a total of 12 pre-defined sectors. How many people voted for milk? Fill in the blank

	frequency	sectors
total	60	12
water	40	
milk		3
other		

- 3 A large set of information is collected and represented in a pie chart of 24 equally-sized sectors. Each one sector represents a frequency of 15. What is the total frequency of this dataset? Fill in the blank

- 4 The incomplete ratio table shows a dataset being converted into angles to represent each subgroup as sectors on a pie chart. Match the letters to the correct missing values. Write the correct letter in each box

	frequency	angle
forest	30	120
river	12	<i>d</i>
field	22	<i>e</i>
other	26	104
total	<i>a</i>	<i>b</i>

c

a	a
b	b
c	c
d	d
e	e

	88
	360
	4
	90
	48

- 5 Which of these parts of a circle are essential when forming one sector of a circle? Tick 2 correct answers

- ☐ the whole circumference / perimeter of a circle
- ☐ part of the circumference of a circle, called an arc
- ☐ two radiuses / radii of a circle (distance from centre to circumference)
- ☐ two diameters of a circle (distance across the whole circle and through centre)
- ☐ two tangents of a circle (line that touches the circumference at one point)

- 6 The incomplete ratio table shows a dataset being converted into angles to represent each subgroup as sectors on a pie chart. Find the value of angle a , in degrees. Fill in the blank

	frequency	angle
white	135	
wholemeal	260	a
granary	85	
total		360
