Constructing scatter graphs

- 1 Data which has two variables that are paired together is called _____ data. Fill in the blank
- 2 Which is another term to describe the explanatory variable in bivariate data? Tick **1** correct answer
- ☐ dependent variable
- ☐ independent variable
- ☐ response variable
- 3 Which two terms describe a measure in bivariate data whose value is predicted to be affected by the other measure? Tick **2** correct answers
- ☐ dependent variable
- ☐ explanatory variable
- ☐ independent variable
- ☐ response variable
- 4 Which variable should be represented on vertical axis of a scatter graph? Tick **1** correct answer
- ☐ dependent variable
- ☐ independent variable
- 5 A set of bivariate data measures children's ages and shoe sizes. Which variable is most likely to be the dependent variable? Tick **1** correct answer
- ☐ age
- ☐ shoe size

- 6 Look at the second column in the table. Which scatter graph has chosen the most appropriate scale to plot this data? Tick **1** correct answer

course length (m)	time to complete (s)
100	142
200	306
400	631
500	790
800	1116
