

Problem solving with graphing linear relationships

1 The gradient is a measure of how _____ a line is. Tick **1** correct answer

- ☒ steep
☐ high
☐ low
☐ long

2 Which of the values are missing from the table of values for the first five terms of the sequence $7n - 10$? Tick **3** correct answers

Term number (n)	1	2	3	4	5
Term value (T)			11		25

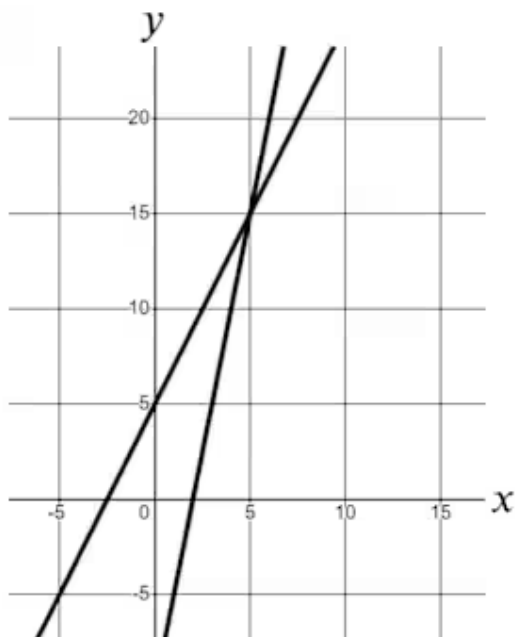

- ☐ - 10
☒ - 3
☒ 4
☐ 7
☒ 18

3 A pupil is saving money. They start with £ 30 and save £ 8 per week. How much will they have after 5 weeks? Fill in the blank

£70

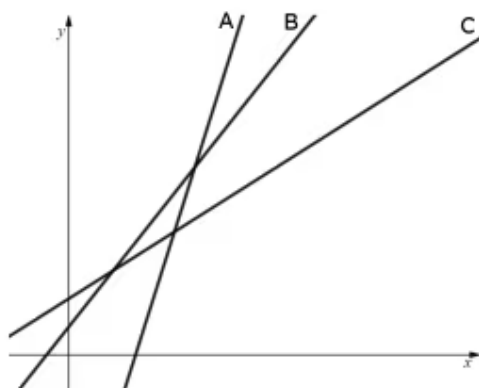

4 At what coordinates do these two lines intersect? Tick **1** correct answer

- ☐ (0, 5)
- ☐ (2, 0)
- ☒ (5, 15)
- ☐ (15, 5)
- ☐ (1, 3)

5 Which of these lines has the steeper gradient? Tick **1** correct answer

- ☒ A
- ☐ B
- ☐ C

6 Will this table of values plot a linear relationship? Tick **1** correct answer

x	0	1	3	6	10
y	5	10	15	20	25

- ☐ Yes. The y values have a constant difference of + 5.
- ☒ No. Both variables are not changing at a constant rate.
- ☐ It's impossible to tell until plotted.
