

Checking and securing understanding of plotting coordinates with technology

1 Which words describe this plotted sequence? Tick **3** correct answers

- ☒ linear
- ☒ arithmetic
- ☐ increasing
- ☒ decreasing
- ☐ quadratic

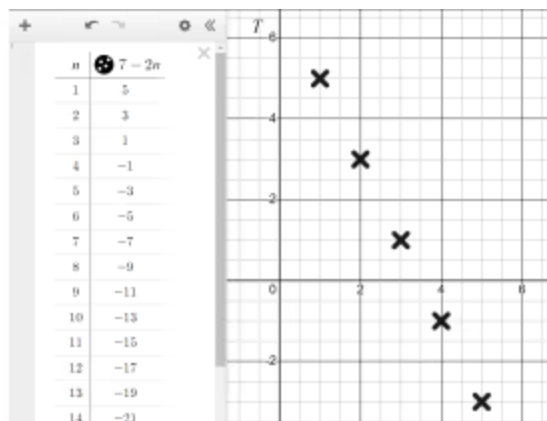

2 Why did the software not plot the coordinate (3, 5) in this image? Tick **1** correct answer

- ☐ Because 3 and 5 aren't labelled on the x and y axes.
- ☐ The scale on the axes is wrong.
- ☐ We are zoomed in on the wrong region of the graph to see it.
- ☒ You have to write the coordinate pair in brackets.

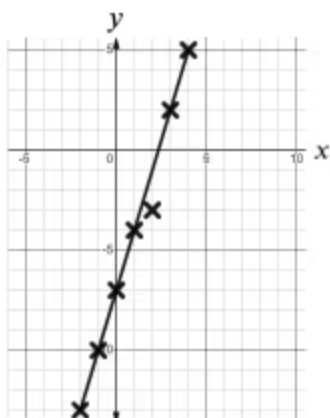

3 Which arithmetic sequence is represented here? Tick **1** correct answer

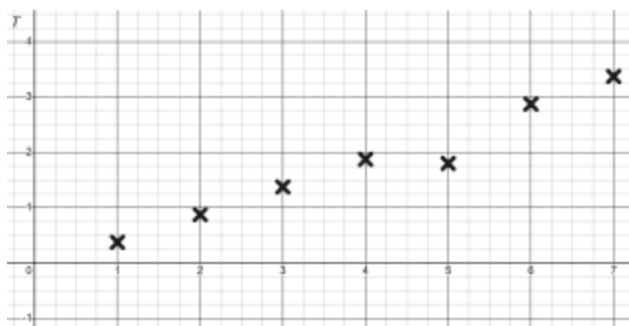

- ☐ n
- ☐ $-2n$
- ☐ $5 - 2n$
- ☒ $7 - 2n$

4 How do we know that $(2, -3)$ does not follow the same linear rule as the other coordinates? Tick **1** correct answer

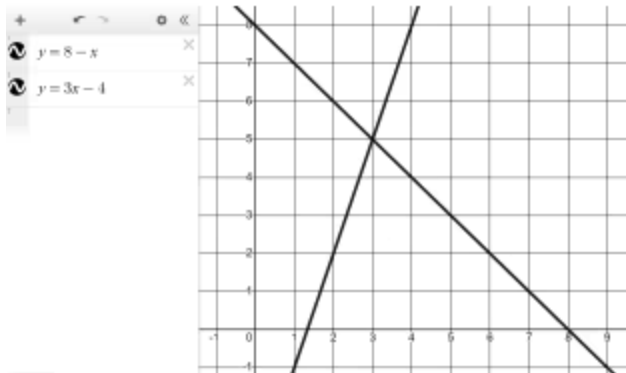

- ☐ It's in the wrong quadrant.
- ☐ It's plotted wrong.
- ☒ It doesn't align with the other coordinates.
- ☐ Because the y coordinate is less than the x coordinate.

5 Which term is incorrect in this arithmetic sequence? Tick **1** correct answer

- ☐ The 1st one
- ☐ The 3rd one
- ☒ The 5th one
- ☐ The 7th one

6 Which coordinate fits both of the rules $y = 8 - x$ and $y = 3x - 4$? Tick **1** correct answer

- ☐ (0, 8)
- ☐ (8, 0)
- ☒ (3, 5)
- ☐ (5, 3)
- ☐ No coordinate fits both rules.
