

Checking and securing plotting a relationship

- 1 All of these coordinates fit the relationship $x + y = 5$. This is an example of a _____ relationship. Tick **1** correct answer

- ☐ quadratic
- ☒ linear
- ☐ diagonal
- ☐ constant

- 2 What is the relationship between the x and y coordinates for the set $(-1, -2)$, $(0, 0)$, and $(1, 2)$? Tick **1** correct answer

- ☐ x is always 1 away from y .
- ☐ x is always 1 more than y .
- ☐ x is double y .
- ☒ y is double x .

- 3 If we plot these coordinates will we see a linear relationship? $(0, 3)$, $(1, 4)$, $(2, 5)$, $(3, 7)$, and $(4, 7)$. Tick **1** correct answer

- ☐ Yes. This is an increasing linear relationship.
- ☒ No. They do not fit the same rule.
- ☐ It's impossible to know until we plot them.

4 Match the coordinates to the respective rule. Write the correct letter in each box

a	(1, 5)
b	(3, 2)
c	(5, 2)
d	(3, 5)

d	$y = 2x - 1$
c	$y = x - 3$
b	$x + y = 5$
a	$y = 3x + 2$

5 These coordinates all fit the relationship $y = 2x^2$. Which words describe this relationship? Tick 2 correct answers

- ☐ Linear
☒ Non-linear
☐ Straight line
☒ Curve

6 Some pupils are sharing 36 sweets. As the number of pupils (p) varies, the numbers of sweets (s) each student gets varies. Which of the below represents this relationship? Tick 1 correct answer

☐ $\frac{p}{36} = s$

☒ $\frac{36}{p} = s$

☐ $\frac{s}{36} = p$

☐ $p = 36s$
