

Defining features of linear relationships

1 The _____ is how quickly one variable changes with respect to another. If the change is constant, there is a linear relationship between the variables. Tick **1** correct answer

- ☒ rate of change
- ☐ rate of increase
- ☐ rate of decrease
- ☐ increase
- ☐ decrease

2 Here is a table of values for the relationship $y = 2x - 3$. Which statements are true of the rate of change between the two variables? Tick **2** correct answers

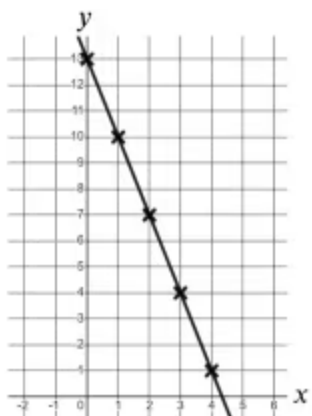

$$y = 2x - 3$$

x	-2	-1	0	1	2	3
y	-7	-5	-3	-1	1	3

- ☐ For every change of + 1 in x there is a change of - 2 in y .
- ☒ For every change of + 1 in x there is a change of + 2 in y .
- ☐ For every change of + 1 in y there is a change of + 2 in x .
- ☒ For every change of + 2 in x there is a change of + 4 in y .

3 What constant rate of change is shown by this linear graph? Tick **1** correct answer

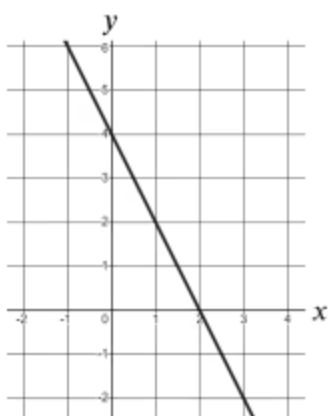

- ☐ For every change of $+1$ in x there is a change of $+3$ in y .
- ☐ For every change of $+1$ in y there is a change of $+3$ in x .
- ☒ For every change of $+1$ in x there is a change of -3 in y .
- ☐ For every change of $+1$ in y there is a change of -3 in x .

4 An _____ is the coordinate where a line or curve meets a given axis. Tick **1** correct answer

- ☐ interval
- ☐ inequality
- ☒ intercept
- ☐ axis
- ☐ x coordinate

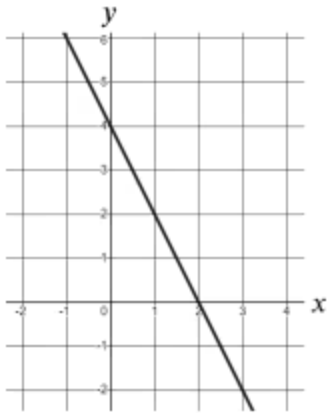

5 What is the y -intercept of this line? Tick **1** correct answer

- ☐ 2
- ☐ $(2, 0)$
- ☐ -2
- ☒ $(0, 4)$
- ☐ 4

6 Which unique statement describes this line? Tick **1** correct answer

- ☐ Starts at 4 and has a rate of change of -2
- ☐ Starts at 2 and has a rate of change of $+2$
- ☐ y-intercept at $(4, 0)$ and has a rate of change of $+2$
- ☒ y-intercept at $(0, 4)$ and has a rate of change of -2
