

Considering a route

- 1 Jacob boards a bus at 13:51. He alights the bus at 14:28. How many minutes did he spend on the bus?

37

- 2 A car travels 40 miles per gallon. Therefore, it consumes 0.025 gallons per mile. (Fill in the blank)

- 3 1 gallon $\approx$ 4.546 litres. Use this approximation to convert 12 litres to gallons. Give your answer accurate to 3 significant figures.

2.64 gallons

- 4 Petrol is sold for 142.9 p per litre. 1 gallon $\approx$ 4.546 litres. How much would 2.5 gallons of petrol cost? Give your answer in pence to the nearest penny.

1624 p

- 5 A person drives 8.2 miles by car. On average, their car travels 50 miles per gallon of petrol. Which calculation would find the amount of petrol consumed during the journey, in gallons? (Tick 1 correct answer)

☐ $1 \div 50 \div 8.2$

☒ $1 \div 50 \times 8.2$

☐ $1 \times 50 \div 8.2$

☐ $1 \times 50 \times 8.2$

- 6 Adult bus tickets cost £3.50 each way. Children bus tickets cost £1.80 each way. Two adults and three children all make a two-way journey by bus. The total cost of their bus tickets is £ 24.80. (Fill in the blank)
