

## Predicting the weather

---

- 1 6.5 mm of rain means that every one square metre of area will have 6.5 \_\_\_\_\_ of water fall on top of it. (Tick **1** correct answer)

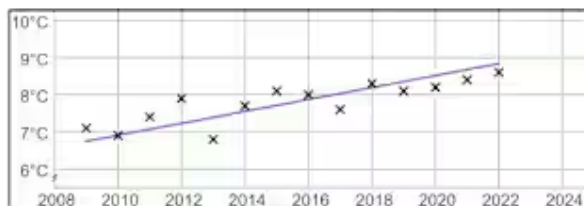

- ☐ millilitres
- ☐ centilitres
- ☐ litres
- ☐ gallons

- 2 Find the value of  $x$ .

| area (m <sup>2</sup> ) | rainfall   |
|------------------------|------------|
| 1                      | 5 litres   |
| 1600                   | $x$ litres |

\_\_\_\_\_

- 3 This graph shows the mean night-time temperature in November each year from 2009 to 2022 in Oakfield. Which year had the lowest mean night-time temperature for November?

\_\_\_\_\_

4 Which likelihood describes an event with a probability of 100%? (Tick **1** correct answer)

- ☐ impossible
- ☐ unlikely
- ☐ even chance
- ☐ likely
- ☐ certain

5 A weather forecast shows 20 days that have a 40% chance of rain. For how many of these 20 days could we expect rain?

\_\_\_\_\_

6 The chart shows that it rained on \_\_\_\_\_ % of the days, during the period of time shown. (Fill in the blank)
