

## Studying local climate change

- 1 The graph shows data from the Met Office about the average number of days with air frost per month from 1941 to 2022, in Nairn and Oxford. Which statement is true, based on this data? (Tick **1** correct answer)

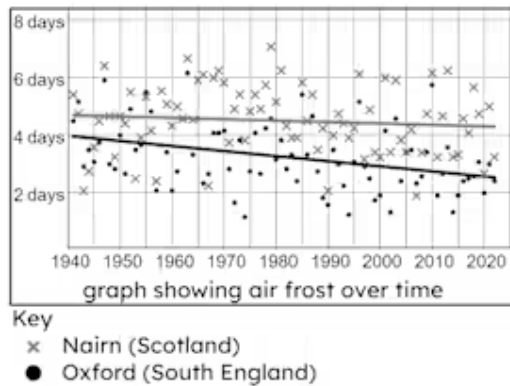

- ☐ Nairn tends to have fewer days with air frost than Oxford, per year.
- ☐ Nairn tends to have the same number of days with air frost as Oxford, per year.
- ☐ Nairn tends to have more days with air frost than Oxford, per year.

- 2 The graph shows data from the Met Office about the average number of days with air frost per month from 1941 to 2022, in Nairn and Oxford. The trend line for Oxford has a \_\_\_\_\_ gradient. (Fill in the blank)

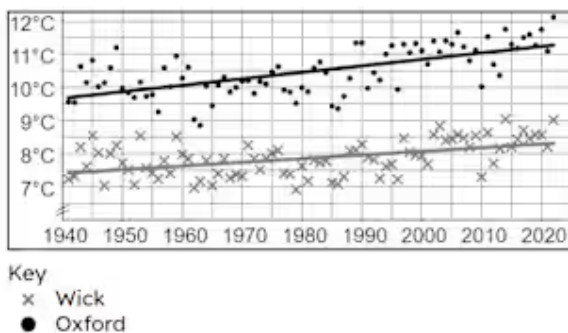

- 3 The graph shows data from the Met Office about the average number of days with air frost per month in two locations. The data suggests that the number of days in Oxford with air frost has... (Tick **1** correct answer)

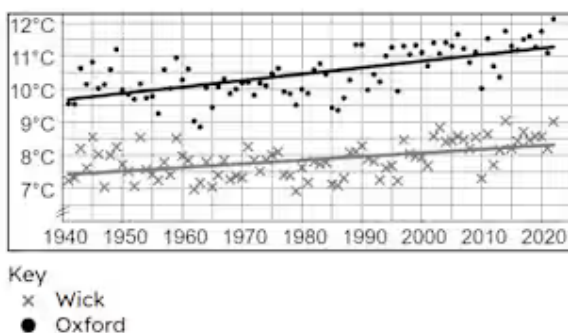

- ☐ generally decreased during the time period shown.
- ☐ generally stayed the same during the time period shown.
- ☐ generally increased during the time period shown.

- 4 The graph shows data from the Met Office about the average annual temperature from 1941 to 2022 in Wick and Oxford. The trend line for each location has a \_\_\_\_\_ gradient. (Fill in the blank)

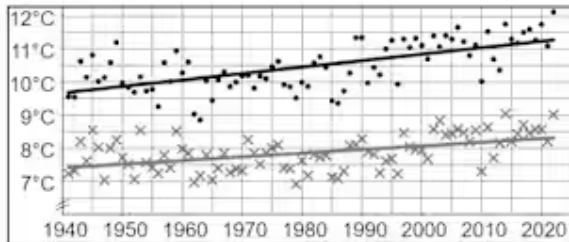

- 5 The graph shows data from the Met Office about the average annual temperature from 1941 to 2022 in Wick and Oxford. Which statement is true for the data shown? (Tick **1** correct answer)

- ☐ The average temperature in Oxford has generally decreased over time.
- ☐ The average temperature in Oxford has generally stayed the same over time.
- ☐ The average temperature in Oxford has generally increased over time.

- 6 The graph shows data from the Met Office about the average annual temperature from 1941 to 2022 in Wick and Oxford. Which statement is true, based on this data? (Tick **1** correct answer)

Key  
× Wick  
● Oxford

- ☐ Wick tends to be warmer than Oxford.
- ☐ Oxford tends to be warmer than Wick.
- ☐ Oxford and Wick tend to be a similar temperature.
