

Agricultural worker (animals)

- 1 If the area of a barn is 300 m^2 and a cow requires a living area of 10 m^2 , calculate the number of cows that the barn can safely hold.

30

- 2 If the area of a barn is 300 m^2 and a sheep requires a living area of 2 m^2 , calculate the number of sheep that the barn can safely hold.

150

- 3 If the area of a barn is 300 m^2 and a pig requires a living area of 2.2 m^2 , calculate the number of pigs that the barn can safely hold.

136

- 4 If it costs £34 218.75 per year to care for a herd of cows and they generate an income of £75 482 per year, what is the result? (Tick 1 correct answer)

- ☐ A loss of £41 263.25
- ☐ A loss of £34 218.75
- ☒ A gain of £41 263.25
- ☐ A gain of £75 482

- 5 If it costs £34 218.75 per year to care for a herd of cows and they generate an income of £75 482 per year, what is the percentage profit (to the nearest percent)?

121%

- 6 If it costs £20 950.20 per year to care for a herd of pigs and they generate an income of £27 120 per year, what is the percentage profit (to the nearest percent)?

29%
