## Interior designer

---

- 1 The area is the size of the surface and states the number of unit squares needed to completely cover that surface. (Fill in the blank)
- 2 Aisha wants to paint the ceilings in a house. The coverage is  $11 \text{ m}^2$  per litre and tubs are 10 litres. What is the area (in  $\text{m}^2$ ) that one tub can cover?  
110
- 3 Aisha wants to paint the ceilings in a house. One tub of paint covers  $110 \text{ m}^2$ . The area of the ceilings is  $98 \text{ m}^2$  and this must be painted twice. How many tubs of paint are needed?  
2
- 4 Calculate the cost per metre of the 2.4 metre length. Give your answer in pounds to the nearest penny.

| Length (m) | Price (£) |
|------------|-----------|
| 2.4        | 4.70      |
| 3          | 5.75      |
| 3.6        | 6.80      |
| 4.2        | 7.85      |
| 4.8        | 8.90      |

£1.96

- 5 Calculate the cost per metre of the 3.6 metre length. Give your answer in pounds to the nearest penny.

| Length (m) | Price (£) |
|------------|-----------|
| 2.4        | 4.70      |
| 3          | 5.75      |
| 3.6        | 6.80      |
| 4.2        | 7.85      |
| 4.8        | 8.90      |

£1.89

- 6 Which length is the best value for money based on the cost per metre? (Tick **1** correct answer)

| Length (m) | Price (£) |
|------------|-----------|
| 2.4        | 4.70      |
| 3          | 5.75      |
| 3.6        | 6.80      |
| 4.2        | 7.85      |
| 4.8        | 8.90      |

☐ 2.4 m

☐ 3 m

☐ 3.6 m

☐ 4.2 m

☒ 4.8 m
