

Interior designer

Task A: Measurements in interior design

1) Below are sketches of the walls in a room. (Not to scale)

A 2.5 litre tin of paint covers 25 m^2 .

The walls will need 2 coats of paint.

How many tins of paint are needed to paint the room?

2) An interior designer wants to wallpaper a wall.

Below is a sketch of the wall.

The width of a roll of wallpaper is 52 cm and the length of the roll is 10.5 m.

How many rolls of wallpaper are needed to paper this wall?

Task B: Finance in interior design

1) The total area that needs painting in a house is 211.2 m^2 .

The paint covers 16 m^2 per litre.

The walls will need 2 coats of paint.

Calculate the cost to paint the room, ensuring that there is minimum wastage.

Size of tin (l)	Cost (£)
2.5	45.49
5	85.99
10	130.99

2) I need the following lengths of wood:

$4 \times 1.9 \text{ m}$, $6 \times 1.7 \text{ m}$ and $4 \times 0.5 \text{ m}$

a) What is the cost of the wood with minimum wastage?

b) How much wastage is there?

Length (m)	Price (£)
2.4	4.20
3	5.25
3.6	6.30
4.2	7.35
4.8	8.40
