

Checking understanding of arithmetic sequences

Task A: Identifying arithmetic sequences

1) Label these sequences as 'arithmetic' or 'not arithmetic'.

a) $9, 13, 17, 21, 25, \dots$

b) $37, 31, 25, 19, 13, \dots$

c) $-70, -68, -66, -64, -62, \dots$

d) $35, 31, 26, 20, 13, \dots$

e) $12.6, 13.7, 14.8, 15.9, \dots$

f) $3, 6, 12, 24, 48, \dots$

g) $\frac{13}{29}, \frac{18}{29}, \frac{23}{29}, \frac{28}{29}, \dots$

h) $\frac{1}{2}, \frac{1}{3}, \frac{1}{4}, \frac{1}{5}, \dots$

Task B: Checking understanding of arithmetic sequences

1) Find the first five terms of these three sequences:

a) $3n + 7$

b) $3n - 7$

Term number (n)	1	2	3	4	5
Term (T)					

Term number (n)	1	2	3	4	5
Term (T)					

c) $0.3n + 7$

d) $7 - 3n$

Term number (n)	1	2	3	4	5
Term (T)					

Term number (n)	1	2	3	4	5
Term (T)					

2) Find the 10th, 50th, and 100th terms of these sequences.

a) $9n + 6$

b) $9n - 6$

c) $0.9n + 0.6$

d) $6 - 9n$

Task C: Representations of arithmetic sequences

1) Draw a visual representation for the first five terms of these sequences:

- a) 5, 7, 9, 11,13, ...
- b) 13,10, 7, 4, 1
- c) $5n + 1$

2) Plot the first five terms of these sequences:

a) $4n - 3$

n	1	2	3	4	5
T					

b) $10 - 3n$

n	1	2	3	4	5
T
