- 4 405 is a term in the arithmetic sequence with the rule $7n - 50$. What is its position in the sequence? $n =$ _____ Fill in the blank

5 Is 189 a term in the arithmetic sequence $7n - 50$? Tick **1** correct answer

- ☐ Yes, because 189 is odd and the sequence contains a lot of odd numbers.
- ☐ Yes, because $189 \div 7 = 27$
- ☐ No, because 189 is odd and the sequence is mostly even.
- ☐ No, because $7n - 50 = 189$ has a non-integer solution.
