

Features of geometric sequences

1 A geometric sequence is a sequence with a constant _____ relationship between successive terms. Tick **1** correct answer

- ☐ additive
- ☐ decreasing
- ☐ increasing
- ☒ multiplicative

2 The next term in this geometric sequence 7, 14, 28, ... is 56. Fill in the blank

3 Which of these are geometric sequences? Tick **2** correct answers

- ☐ 3, 6, 9, 12, ...
- ☒ 3, 6, 12, 24, ...
- ☐ 3, 6, 10, 15, ...
- ☐ 3, 9, 15, 21, ...
- ☒ 3, 9, 27, 81, ...

4 Which of these numbers will be a term in the geometric sequence: "Start on 2 and use a common multiplier of 5"? Tick **3** correct answers

- ☒ 10
- ☒ 50
- ☐ 100
- ☐ 500
- ☒ 1250

- 5 Which of these numbers will be terms of the geometric sequence: "Start on 432 and use a common multiplier of $\frac{1}{2}$ "? Tick **3** correct answers

☐ 864

☒ 108

☐ 72

☒ 27

☒ $\frac{27}{2}$

- 6 The 1st term of a geometric sequence is not zero and the common ratio is negative. Which of these statements is true about this sequence? Tick **1** correct answer

☐ It decreases.

☐ It decreases but never reaches zero.

☒ The terms will oscillate between positive and negative.

☐ All of the terms will be negative.
