

Comparing summaries of data

- 1 Match the summary statistic to the word that can be used to help in its interpretation. Write the correct letter in each box

a	mean
b	median
c	mode
d	range

d	how varied the data set is
c	most frequent value
a	typical value
b	middle value

- 2 Which of these is a valid interpretation of the mean number of points Lucas and Sofia have scored when playing the new video game? Tick **1** correct answer

		
	Lucas	Sofia
mean	78.3	87.1
median	80	79
mode	84	78
range	22	16
Both Lucas and Sofia play a new video game. They check the achievements screen, which shows a statistical summary of the number of points they both scored over several games.		

- ☐ Both Lucas and Sofia's most frequent number of points per game is almost equal.
- ☐ Sofia's typical number of points scored per game is lower than Lucas'.
- ☒ Sofia's typical number of points scored per game is higher than Lucas'.
- ☐ Lucas' middle-scoring game is lower than Sofia's middle-scoring game.
- ☐ Lucas' middle-scoring game is higher than Sofia's middle-scoring game.

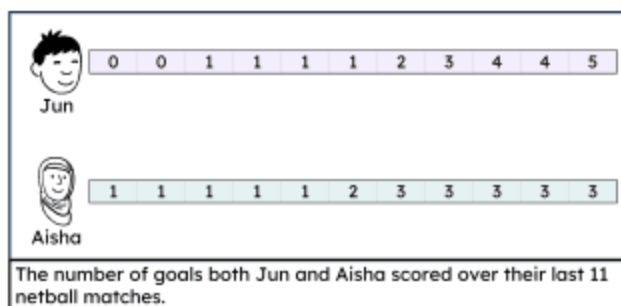

- 3 Which of these is a valid interpretation of the range of points Lucas and Sofia scored when playing the new video game? Tick **2** correct answers

		
	Lucas	Sofia
mean	78.3	87.1
median	80	79
mode	84	78
range	22	16

Both Lucas and Sofia play a new video game. They check the achievements screen, which shows a statistical summary of the number of points they both scored over several games.

- ☐ The variety of points Sofia scored is higher than Lucas'.
- ☒ The variety of points Sofia scored is lower than Lucas'.
- ☐ The variety of points Sofia and Lucas scored are almost equal.
- ☐ Sofia has a lower consistency of points than Lucas.
- ☒ Sofia has a higher consistency of points than Lucas.

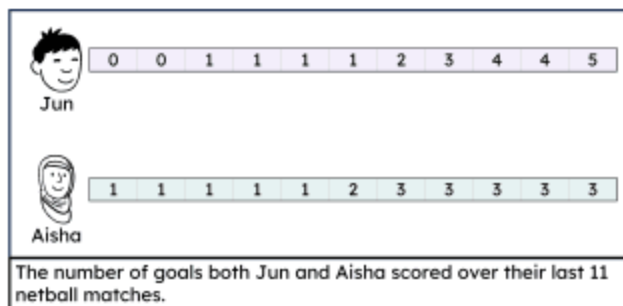

- 4 Which of these statements are true for the median and modal number of goals Jun and Aisha scored over 11 netball matches? Tick **2** correct answers

- ☐ The median number of goals scored by Jun in a match is higher than Aisha.
- ☒ The median number of goals scored by Aisha in a match is higher than Jun.
- ☐ The modal number of goals scored in a match by Aisha and Jun are equal.
- ☒ Aisha's goals scored in a match is bimodal, with one mode higher than Jun's.

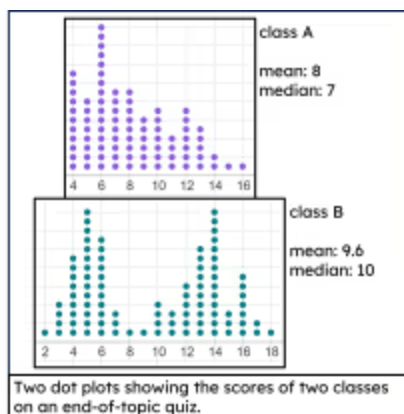

- 5 Which of these statements are an accurate interpretation of the number of goals Jun and Aisha scored over 11 netball matches? Tick **2** correct answers

- ☐ On a mean average match, Jun will score 2 goals more than Aisha.
- ☒ On a mean average match, Jun and Aisha will score the same number of goals.
- ☒ However, Aisha is more consistent at scoring goals.
- ☐ However, Jun is more consistent at scoring goals.

- 6 Which of these statements combine to make an accurate comparison of which class performed better on an end-of-topic quiz. Tick **3** correct answers

- ☐ The typical score of a student in class A is 1.6 higher than class B.
- ☒ The typical score of a student in class B is 1.6 higher than class A.
- ☒ However, class A had a more consistent set of scores.
- ☒ In conclusion, class B did better, as their middle-scoring student did better.
- ☐ In conclusion, class A did better, as their most frequent score was higher.
