

Analysing different statistical representations

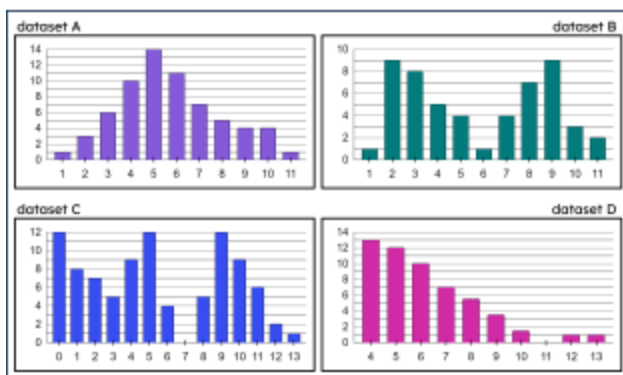

1 In which of these statistical graphs can the frequency of the data set be seen from the graph alone? Tick **3** correct answers

- ☒ bar chart
- ☐ line graph
- ☐ pictogram
- ☒ pie chart
- ☒ scatter graph

2 Which of these statistical graphs is best at showing the change in the value of something over time? Tick **1** correct answer

- ☐ bar chart
- ☒ line graph
- ☐ pictogram
- ☐ pie chart
- ☐ scatter graph

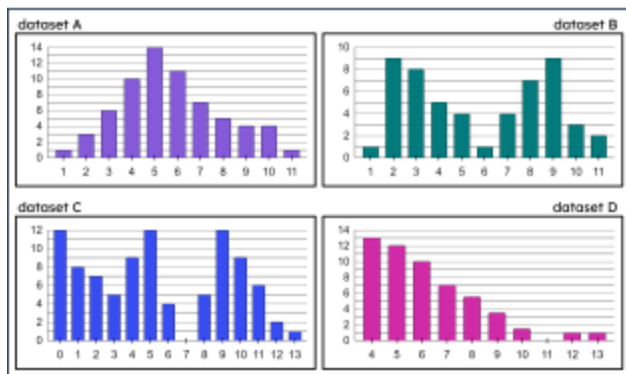

3 Which of the following statements is true when describing the mode of these four bar charts? Tick **3** correct answers

- ☐ Data set A is bimodal.
- ☒ Data set B is bimodal.
- ☒ At least one data set is trimodal.
- ☐ The highest modal frequency is 13.
- ☒ The highest modal frequency is 14.

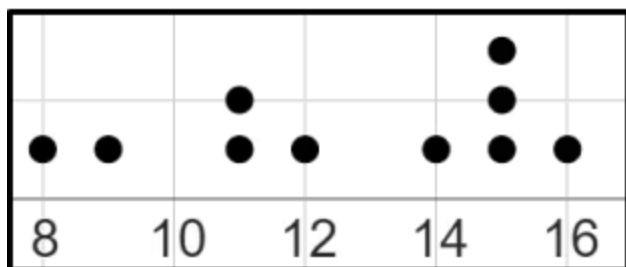

- 4 Match the statements that summarise these bar charts to the value that end each sentence. Write the correct letter in each box

a	The range of data set C is
b	The range of data set D is
c	The median of A, B, and C is
d	The mode of data set D is

a	13
b	9
c	5
d	4

- 5 How much larger is the mode of this dot plot compared to its mean? 2 Fill in the blank

- 6 How much larger is the mean of this dot plot compared to its mode? Give your answer rounded to 1 decimal place. 0.6 Fill in the blank
