

Statistical problems - statistical summaries

1 Which statistical summary is not a type of average? Tick **1** correct answer

- ☐ mean
- ☐ median
- ☐ mode
- ☒ range

2 Select the type of average that could be used for the following data: dog, cat, dog, dog, fish, cat, cat, hamster, cat Tick **1** correct answer

- ☐ mean
- ☐ median
- ☒ mode
- ☐ range

3 Each data set has a mean of 50. For which data set is this average the least representative of numbers in the set? Tick **1** correct answer

- ☐ 45, 49, 49, 51, 52, 54
- ☐ 49, 49, 50, 50, 50, 52
- ☒ -337, 109, 120, 131, 138, 139

4 Select the type of average which would least represent the central tendency of the following data: 1, 2, 5, 6, 7, 10, 10 Tick **1** correct answer

- ☐ mean
- ☐ median
- ☒ mode

- 5 The table provide a statistical summary of data about monthly rainfall in four regions. Which region tends to get the most rainfall? Tick **1** correct answer

region	mean	range
Armagh	67.9	186.1
Bradford	72.7	264.8
Cardiff	53.6	194.2
Dundee	92.4	246

- ☐ Armagh
- ☐ Bradford
- ☐ Cardiff
- ☒ Dundee

- 6 The table provide a statistical summary of data about monthly rainfall in four regions. In which region is the amount of rainfall most consistent? Tick **1** correct answer

region	mean	range
Armagh	67.9	186.1
Bradford	72.7	264.8
Cardiff	53.6	194.2
Dundee	92.4	246

- ☒ Armagh
- ☐ Bradford
- ☐ Cardiff
- ☐ Dundee
