

Problem solving with numerical summaries of data

- 1 The central tendency of a dataset can be described by using an average, such as the mean, median or mode. Fill in the blank
- 2 The spread of a dataset can be described by using the _____. Tick 1 correct answer
- ☐ mean
- ☐ median
- ☐ mode
- ☒ range
- 3 The table shows summary statistics about how many points each person scored during a series of hockey games. The mode suggests that Sofia tended to score the highest each game. Fill in the blank

score	Aisha	Jun	Sofia
mean	4.9	6.7	6
median	7	6	6
mode	1	5	6
range	8	4	5

- 4 The table shows summary statistics about how many points each person scored during a series of hockey games. Which measure suggests that Jun tended to score the highest in each game? Tick **1** correct answer

score	Aisha	Jun	Sofia
mean	4.9	6.7	6
median	7	6	6
mode	1	5	6
range	8	4	5

- ☒ mean
☐ median
☐ mode
☐ range

- 5 The table shows summary statistics about how many points each person scored during a series of hockey games. Which measure suggests that Aisha tends to score the highest in each game? Tick **1** correct answer

score	Aisha	Jun	Sofia
mean	4.9	6.7	6
median	7	6	6
mode	1	5	6
range	8	4	5

- ☐ mean
☒ median
☐ mode
☐ range

- 6 The table shows summary statistics about how many points each person scored during a series of hockey games. Whose scores tend to be the most consistent? Tick **1** correct answer

score	Aisha	Jun	Sofia
mean	4.9	6.7	6
median	7	6	6
mode	1	5	6
range	8	4	5

☐ Aisha☒ Jun☐ Sofia
