

Problem solving with numerical summaries of data

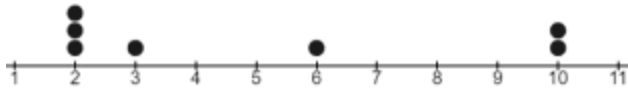

- 1 The dot plot represents a set of data. The mode for this data is 2. Fill in the blank

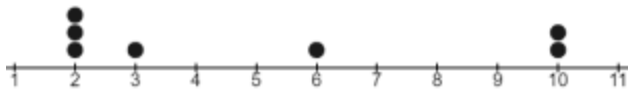

- 2 The dot plot represents a set of data. The median for this data is 3. Fill in the blank

- 3 The dot plot represents a set of data. The mean for this data is 5 Fill in the blank

- 4 The dot plot represents a set of data. The range for this data is 8 Fill in the blank

- 5 Select all of the measures that are types of averages. Tick **3** correct answers

- ☒ mean
- ☒ median
- ☒ mode
- ☐ range
- ☐ total

6 Two classes of pupils sit a test. The range of scores in Class A is 22; the range in scores for Class B is 35. Which conclusion is valid for this statistical summary? Tick **1** correct answer

- ☐ The scores in Class A tended to be higher than the scores in Class B.
- ☐ The scores in Class A tended to be lower than the scores in Class B.
- ☒ The scores in Class A tended to be more consistent than the scores in Class B.
- ☐ The scores in Class A tended to be less consistent than the scores in Class B.
