

Understanding the median

1 The median is the central piece of data when the data are in numerical order. It is a measure of central tendency representing the average of the values. Fill in the blank

2 Match the number of data points with the position of the median. Write the correct letter in each box

a	65 values
b	66 values
c	61 values
d	68 values

<i>b</i>	33.5th position
<i>a</i>	33rd position
<i>c</i>	31st position
<i>d</i>	34.5th position

3 The median from this list: 2.4, 2.5, 2.6, 2.6, 2.7, 2.8, 2.8, 2.9 is 2.65. Fill in the blank

4 Which of these data sets can you find the median for? Tick **2** correct answers

☒ 3, 7, 2, 8, 1, 9, 3, 5

☐ cat, dog, rabbit, dog, dog, cat, cat, hamster, fish

☒ -2, -5, -2, -7, -3, -6, -7.2

☐ red, orange, yellow, blue, green, yellow, white, black, purple

- 5 Sam wants to calculate the median of this data set. Is Sam's working correct? Tick **1** correct answer

- ☐ Yes - the middle number has been identified
- ☒ No - the data has not been ordered first

~~14~~, ~~52~~, ~~48~~, 67, ~~23~~, ~~79~~, ~~89~~

- 6 Data is presented in a dot plot. The median value is 4. Fill in the blank
