

Name: _____

Understanding the mode

Task A: Finding a mode

1) What is the **modal** animal?

2) In this set of data, what is the **mode**?

0, 0, 0, 0, 0, 1, 1, 1, 1, 1, 1, 2, 2, 2, 3, 3, 3, 3, 3, 4, 4, 5, 5, 5, 5

3) In this set of data, what is the **mode**?

12, 16, 18, 12, 19, 18, 15, 16, 18, 19, 12, 12, 18, 15, 18

4) Sofia was rolling an eight-sided dice.

What was the **mode** roll on the dice?

I rolled a 6 ten times;
I rolled a 7 twelve times;
I rolled an 8 ten times.

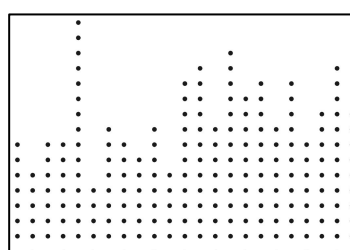

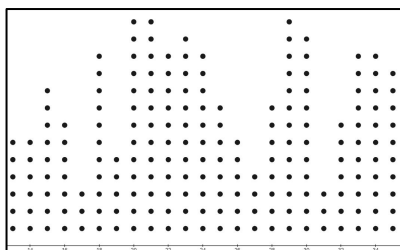

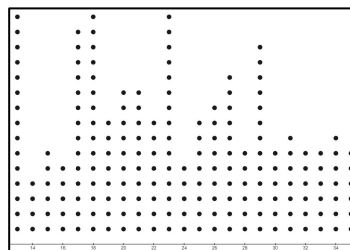

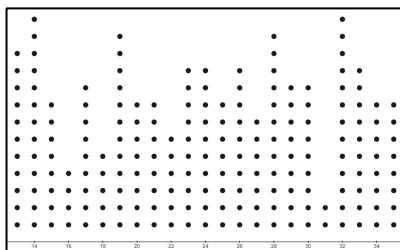

Task B: It is not always one mode

1) Write a data set of 20, that is **bimodal**.

2) Write a data set of 10, that has no **mode**.

3) Write a data set of 20, that is **trimodal**.

4) For each data set, write how many **modes** the data has, if any.

5) What is the **mode** of the data shown on this dot plot?
