

## Calculating the mode

1 The mode is the most frequent value. It is a measure of central tendency representing the average of the values. Fill in the blank

2 Which of these frequency tables has no mode? Tick 1 correct answer

| pet     | frequency |
|---------|-----------|
| cat     | 17        |
| dog     | 12        |
| rabbit  | 8         |
| hamster | 6         |
| other   | 12        |

☐

| bedrooms | frequency |
|----------|-----------|
| 1        | 15        |
| 2        | 16        |
| 3        | 15        |
| 4        | 16        |

☐

| goals | frequency |
|-------|-----------|
| 0     | 17        |
| 1     | 17        |
| 2     | 17        |
| 3     | 17        |
| 4     | 17        |

☒

| flavour    | frequency |
|------------|-----------|
| vanilla    | 18        |
| strawberry | 14        |
| chocolate  | 17        |

☐

3 This line graph shows data about the time taken for the journey to school in one week. Which of the following statements is correct? Tick 1 correct answer

☐ The mode time is 32 minutes as this is the journey which took the most time.

☒ There is no mode as no journey time occurred more than once in the week.

4 The modal pet type is cat. Fill in the blank

| pet     | frequency |
|---------|-----------|
| cat     | 17        |
| dog     | 12        |
| rabbit  | 8         |
| hamster | 6         |
| other   | 12        |

5 This bar chart shows data about the goals scored in matches over a season. The modal number of goals scored in a match is 3 goals. Fill in the blank

6 Select all the data sets that show bimodal data. Tick 2 correct answers

| flavour    | frequency |
|------------|-----------|
| vanilla    | 17        |
| strawberry | 14        |
| chocolate  | 17        |

| bedrooms | frequency |
|----------|-----------|
| 1        | 15        |
| 2        | 12        |
| 3        | 16        |
| 4        | 15        |
