

Summarising data

1 Which of these most closely describe a "measure of central tendency"? Tick **1** correct answer

- ☐ A single value that summarises how spread out or varied a dataset is
- ☐ Always a single value that calculates the middle number in an ordered dataset
- ☐ Usually a single value that calculates the middle number in an ordered dataset
- ☐ Always a single value representing a central property of a distribution
- ☒ Usually a single value representing a central property of a distribution

2 Describe the modal properties of this dataset: 2, 2, 6, 5, 6, 6, 3, 4, 0, 9, 2 Tick **1** correct answer

- ☐ mode at 2
- ☐ mode at 6
- ☐ bimodal at 2 and 5
- ☒ bimodal at 2 and 6
- ☐ trimodal at 2, 5, and 6

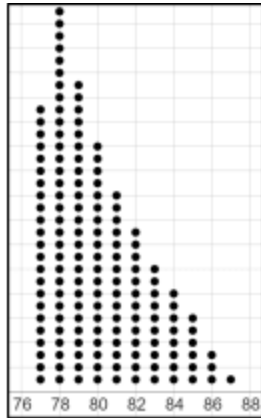

3 For the following dataset, match the summary statistic to its value: 10, 14, 14, 18, 19, 21, 23
Write the correct letter in each box

a	mean
b	median
c	mode
d	range

<i>d</i>	13
<i>b</i>	18
<i>c</i>	14
<i>a</i>	17

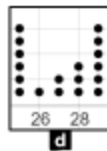

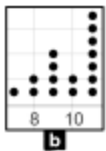

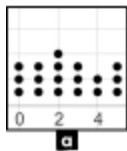

- 4 Which of these is the most likely value of the mean for this dataset, represented by a dot plot? Tick **1** correct answer

- ☐ 10
- ☐ 76
- ☒ 80
- ☐ 86
- ☐ 90

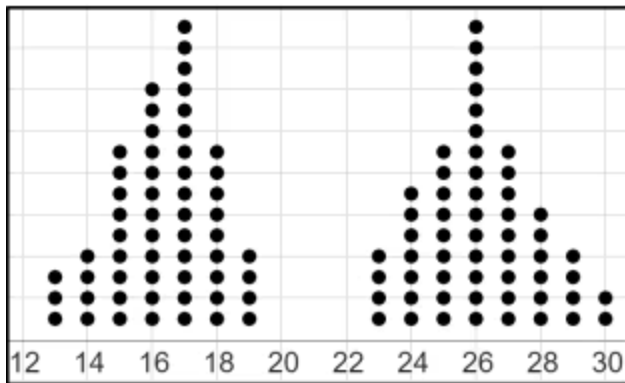

- 5 In which of these dot plots would the mode be a representative summary of the dataset? Tick **2** correct answers

- ☐ a
- ☒ b
- ☐ c
- ☒ d

6 Which of the following statements are true for this dot plot when evaluating whether the median is a representative summary of the data? Tick **3** correct answers

- ☒ The median is approximately 21.
- ☐ The median is approximately 17 and 26.
- ☒ The median may not be the most representative summary.
- ☐ The median will never be a useful summary for this dataset.
- ☒ The median can still be a useful summary for this dataset.
