

Securing understanding of perimeter and area

1 Match the word to its definition Write the correct letter in each box

a	perimeter
b	area
c	parallelogram

c	the quadrilateral with two pairs of parallel and equal sides
a	the distance around a 2D shape
b	the size of the surface

2 What is the minimum information needed to calculate both the area and perimeter of a rectangle? Tick **1** correct answer

- ☐ All four lengths
- ☐ Two parallel lengths
- ☒ Two perpendicular lengths
- ☐ One length and the diagonal

3 True or false? Given a value for the perimeter, there is only one possible rectangle you could draw. Tick **1** correct answer

- ☐ True
- ☒ False

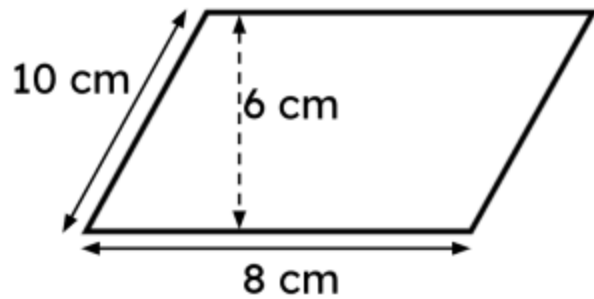

4 A rectangle has an area of 72 units² and a perimeter of 36 units. How long are the length and width? Tick **1** correct answer

- ☐ Length = 9 units and width = 8 units
- ☐ Length = 10 units and width = 8 units
- ☐ Length = 11 units and width = 7 units
- ☒ Length = 12 units and width = 6 units

5 A parallelogram with four interior angles, each equal to 90 degrees, is called a rectangle
Fill in the blank

6 Calculate the area and perimeter of this parallelogram. Tick **1** correct answer

- ☐ Area = 48 m^2 and perimeter = 24 m
- ☒ Area = 48 m^2 and perimeter = 36 m
- ☐ Area = 80 m^2 and perimeter = 24 m
- ☐ Area = 80 m^2 and perimeter = 36 m
