

Calculating missing lengths with perimeter of polygons

- 1 True or false? Summing the length and width of a rectangle gives a result that is half of the perimeter of the rectangle. Tick **1** correct answer

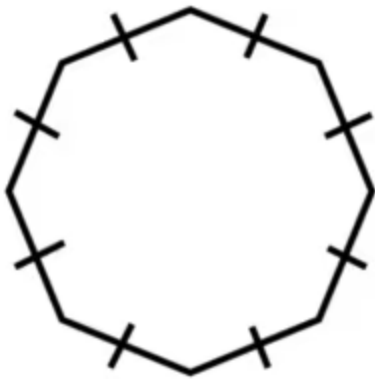

True

False

- 2 The perimeter of the octagon is 184 cm. What is the length of one side? Fill in the blank

23 cm

- 3 Two line segments are congruent if they are _____. Tick **1** correct answer

parallel

perpendicular

the same length

different lengths

- 4 A rectangular garden has a length of 12 meters and a width of 8 meters. What is the perimeter of the garden? Tick **1** correct answer

☐ 20 m

☒ 40 m

☐ 60 m

☐ 96 m

- 5 Lucas is planning to build a rectangular flowerbed in the backyard. They want the flowerbed to have a perimeter of 36 m. If the width of the flowerbed is 6 m, what should be the flowerbed length? Tick **1** correct answer

☐ 6 m

☒ 12 m

☐ 15 m

☐ 18 m

- 6 Dany has a triangular room. The room has side lengths measuring 7 m, 9 m, and x m. The perimeter of the triangular room is 28 m. What is the length of side x ? Fill in the blank

12 m
