

Using the formula for the area of a triangle

1 The perpendicular height is the perpendicular distance from the base to the opposite vertex. Fill in the blank

2 True or false? You can calculate the area of this triangle. Tick **1** correct answer

- ☒ True
☐ False

3 True or false? We can calculate the area of this triangle. Tick **1** correct answer

- ☐ True
☒ False

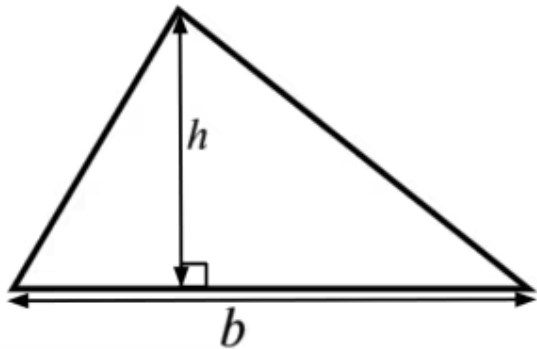

4 Calculate the area of a triangle with a base of 13 cm and a perpendicular height of 3 cm (you do not need to give the units). Fill in the blank

19.5 cm²

5 Two identical triangles can always be placed together to create a parallelogram. Fill in the blank

- 6 Which of these is the correct way to calculate the area of this triangle? Tick **1** correct answer

☐ base $\times$ perpendicular height $\times 0.2$

☐ base $\times$ perpendicular height $\div \frac{1}{2}$

☒ $b \times h \times \frac{1}{2}$

☐ $bh \times 2$
