

Name: _____

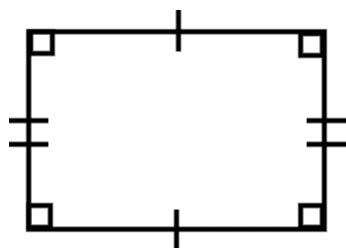

Area of composite rectilinear shapes

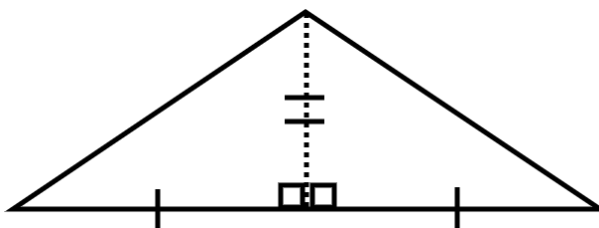

Task A: Comparing areas

1) Order the shapes from smallest to the largest area.

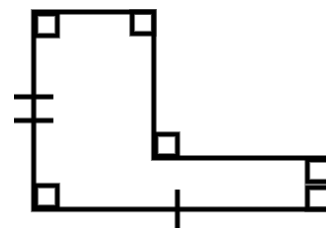

a)

b)

c)

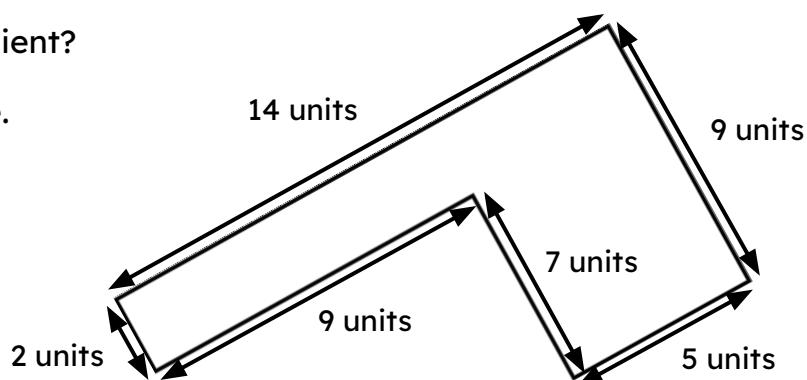

Task B: Three methods to find the area

1) Calculate the area of this composite rectilinear shape using each of the three methods.

Which is most efficient?

Justify your choice.

Task C: Evaluating the methods

1) Draw your own composite rectilinear shape and try to find the area using the three methods.

Can you draw a shape where one (or more) of these methods would not be helpful?
