

Checking understanding of perimeter

Task A: Understanding perimeter

1) Find the perimeter of each shape.

a)

b)

c)

2) Tick the triangles that contain enough information to calculate their perimeter by summing the given lengths. All lengths are given in centimetres.

Task B: Finding efficient methods to calculate perimeter

1) The shapes were formed by reflecting line segments over the dashed mirror lines. Find the perimeter of each shape.

2) Find the perimeter of each shape.

3) Find the perimeter of each composite rectilinear shape. All lengths are given in metres.

Task C: Finding missing lengths when the perimeter is known

1) The perimeter of each shape is 24 m. Find the value of each of the unknowns.

$$a =$$

$$b =$$

$$c =$$

$$d =$$

$$e =$$

$$f =$$
