

Surface area of prisms

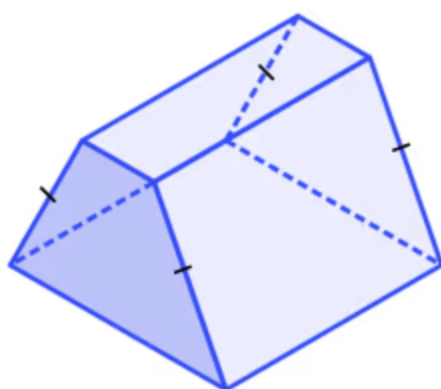

1 The surface area is the total area of all the surfaces of a closed 3D shape. The surfaces include all faces and any curved surfaces. Fill in the blank

2 Which of these are nets for a cube? Tick **2** correct answers

☐

☒

☒

☐

3 Here is a right prism. Which of these descriptions is correct? Tick **1** correct answer

☐ The prism has 6 different shaped faces.

☐ The prism has 6 faces, two are parallelograms and four are rectangles.

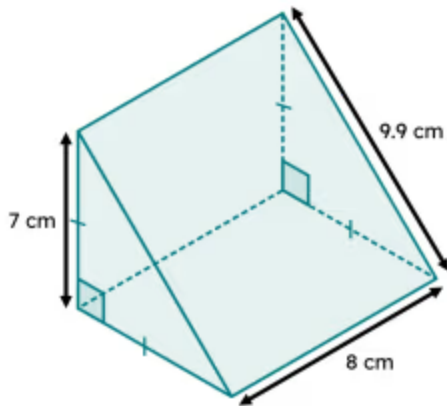

☒ The prism has 6 faces, two are trapeziums and four are rectangles.

☐ The prism has 6 faces, two are isosceles triangles and four are rectangles.

4 The areas of the faces of a triangular prism are 24 cm^2 , 24 cm^2 , 50 cm^2 , 40 cm^2 and 30 cm^2 respectively. The surface area is 168 cm^2 . Fill in the blank

- 5 The surface area of this right-angled isosceles triangular prism is 240.2 cm^2 . Fill in the blank

- 6 In a right prism, the rectangular faces can be seen as one large rectangle. The dimensions of the large rectangle are the perimeter of the base by the length of the prism. Fill in the blank
