

Surface area of cylinders

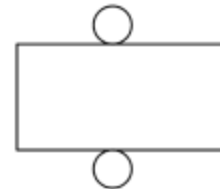

1 A cylinder is a type of prism. True or false? Tick **1** correct answer

- ☐ True - it has a uniform cross-section throughout the length.
- ☒ False - the uniform cross-section is not a polygon.

2 A cylinder is a 3D shape with a base that is a circle and a parallel opposite face that is identical. A cross-section of a cylinder made parallel to the base is congruent to the base. Fill in the blank

3 Which of these is a net of a cylinder? Tick **1** correct answer

☐

☐

☒

☐

4 Which of these is the formula for the surface area of any cylinder, where r is the radius and h is the height? Tick **2** correct answers

- ☐ Surface area = $\pi r^2 + \pi r h$
- ☐ Surface area = $2\pi r^2 + \pi r h$
- ☒ Surface area = $2\pi r^2 + 2\pi r h$
- ☒ Surface area = $2\pi r(r + h)$
- ☐ Surface area = $2(\pi r)^2 + 2\pi r h$

- 5 The surface area of a cylinder with a diameter of 10 cm and a height of 7 cm is 120
 $\pi \text{ cm}^2$. Fill in the blank
- 6 A cylinder has a surface area of $72\pi \text{ cm}^2$ and a radius of 3 cm. What is the length of the cylinder? Tick **1** correct answer
- ☐ 8 cm
- ☒ 9 cm
- ☐ 10 cm
- ☐ 10.5 cm
