

Volume of cylinders

- 1 The area of a circle with radius 6 cm is 36 π cm². Fill in the blank
- 2 A circle has an area of 49π cm². Which of the following statements about the circle are true? Tick 2 correct answers
 - ☐ The diameter is 7 cm.
 - ☐ The circumference is 14 cm.
 - ☒ The radius (in centimetres) is the square root of 49.
 - ☒ The circumference is 14π cm.
- 3 A cuboid with a width of 3 m, a length of 8 m and a height of 6 m has a volume of 144 cm³. Fill in the blank
- 4 A cylinder is a 3D shape with a base that is a circle and a parallel opposite face that is identical. A cross-section of a cylinder made parallel to the base will be congruent to the base. Fill in the blank
- 5 Which of these triangular prisms has a volume of 2250 cm³? Tick 1 correct answer

☐

☐

☐

☒

6 A cuboid has a volume of 90 cm^3 . Its length is 5 cm. What could the dimensions of the cross-section be? Tick **2** correct answers

☐ 3 cm by 5 cm

☒ 3 cm by 6 cm

☐ 8 cm by 10 cm

☒ 18 cm by 1 cm

☐ 50 cm by 9 cm
