

Problem solving with perimeter, area and volume

1 A composite prism can be created by using two or more prisms. Fill in the blank

2 A cube has a volume of 125 cm^3 . The edge length of the cube is 5 cm. Fill in the blank

3 A cube has a volume of 64 cm^3 . The area of one face is 16 cm^2 . Fill in the blank

4 Which of these shapes have the largest volume? Tick **1** correct answer

Shape a

Shape b

They both have the same volume

5 Match the measurement to the context. Write the correct letter in each box

a	Length
b	Area
c	Surface area
d	Volume

c	The amount of silver to cover an earring.
d	The amount of soil to fill in a hole.
a	The amount of ribbon to put around a cake.
b	The amount of carpet to cover a floor.

6 A cylinder has a volume of $300\pi \text{ cm}^3$ and a length of 3 cm. The surface area of the cylinder is 260 $\pi \text{ cm}^2$. Fill in the blank
