

Name: _____

Checking understanding of place value in integers

Task A: Reviewing integer place value

1) Write down the value of the **digit** 8 in each **integer**:

- a) 285
- b) 2805
- c) 20 805 205
- d) 5 000 308
- e) 58 353

2) Write the **integer** 20 805 205 in words.

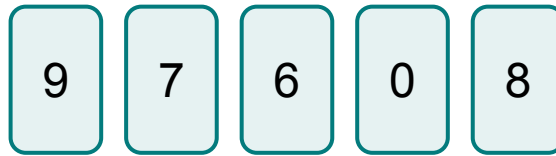

3) Write these using **digits**.

You could use a place value chart to help.

- a) Five hundred and sixteen thousand, two hundred and twelve.
 - b) Forty-two million, ninety-three thousand, seven hundred and one.
- 4) Give an example of an **integer** which:
- a) is greater than 1000
 - b) and is less than 2000
 - c) and has a 5 in the tens place
 - d) and contains the **digits** 3 and 9

Task B: Using place value

Here are some **digit** cards:

1) Use the digit cards to create:

- a) the largest possible 5-**digit integer**
- b) the smallest possible 5-**digit integer**
- c) the 5-**digit integer** that is closest to 90 000
- d) the smallest possible 5-**digit even integer**

2) Using these cards, how many different 5-**digit integers** can you create between 50 000 and 70 000?

How do you know?
