

Securing understanding of ordering and comparing numbers

Task A: Comparing measures

1) Write the correct symbol (<, > or =) to complete each statement.

a) 1.23 m $\bigcirc$ 12.3 cm

d) 985 000 m $\bigcirc$ 958 km

b) 0.456 kg $\bigcirc$ 465 g

e) 30 000 ml $\bigcirc$ 30 l

c) 570 mm $\bigcirc$ 7.5 cm

f) 989 cl $\bigcirc$ 9980 ml

You can use this place value chart to help you with conversion.

		kilo	hecto	deca		deci	centi	milli		

2) Write a digit on each solid line and a symbol (<, > or =) on each dotted line to complete each statement.

a) 0.29 m = 29 cm

d) 0.098 m < 99 mm

b) Possible answers include:

e) Possible answers include:

3.48 kg = 3480 g

200 ml = 0.2 l

3.48 kg < 3490 g

20 l ml > 0.2 l

3.48 kg > 3470 g

f) Possible answers include:

c) Possible answers include:

78 mg < 0.08 g

13 400 cm < 0.15 km

78 mg > 0.07 g

13 400 cm > 0.05 km

3) You have six cards:

7

8

9

<

>

=

Complete this statement in as many ways as possible.

0.879 kg $\bigcirc$ $\square$ $\square$ $\square$ g

0.879 kg = 879 g

0.879 kg < 978 g

0.879 kg > 789 g

0.879 kg < 897 g

0.879 kg < 987 g

0.879 kg > 798 g

Task B: Ordering measures

1) Starting with the smallest, sort the measures into ascending order.

a) 99 cm, 99 mm, 99 km, 99 m

99 mm, 99 cm, 99 m, 99 km

b) 303 ml, 0.03 l, 30 cl, 0.33 l

0.03 l, 30 cl, 303 ml, 0.33 l

c) 0.456 km, 465 m, 64.5 cm, 564 mm

564 mm, 64.5 cm, 0.456 km, 465 m

d) 35 700 mg, 7.53 kg, 7503 g, 3.57 g

3.57 g, 35 700 mg, 7503 g, 7.53 kg

e) 986 cm, 0.896 m, 0.00869 km, 689 mm

689 mm, 0.896 m, 0.00869 km, 986 cm

2) Use these cards to complete each **inequality**.

.

0

1

2

8

9

Use each card only once in each statement. Can you find more than one way to complete the inequalities?

a) Possible answers include:

1.2 cm < 180 mm < 0.29 m or 1.2 cm < 190 mm < 0.82 m

b) There is only one possible answer.

0.08 kg < 89 g < 100 000 mg < 0.2 kg
