

Securing understanding of place value in integers

- 1 Using the digit cards, make the largest 6-digit integer possible Fill in the blank

887 430

- 2 Which of these integers are written with correct spacing? Tick **2** correct answers

☐ 2 423

☒ 5006

☐ 34000

☐ 7 0000

☒ 6 320 041

- 3 Starting with the smallest, sort these integers into ascending order. Use numbers to show the correct order

2	8909
4	9098
5	9908
3	9089
1	8099
6	9980

- 4 Match the integers with the calculations Write the correct letter in each box

a	2032
b	2230
c	2302
d	2320
e	3022

e	$2 \times 10 + 2 \times 1 + 3 \times 1000$
a	$3 \times 10 + 2 \times 1 + 2 \times 1000$
d	$2000 + 20 + 300$
b	$30 + 200 + 2000$
c	$2 \times 1000 + 3 \times 100 + 2$

5 How many unique integers can be made from these digits? Fill in the blank

12

6 Which statements are true for the integer 3830? Tick **2** correct answers

- ☒ The value of the integer stays the same if the 1000s and 10s digits are swapped
- ☐ The smallest 4-digit integer can be made by swapping the 10s and 100s digits
- ☒ The value of the integer decreases if the 10s and 1s digits are swapped
- ☐ The value of the integer stays the same if the first and last digits are swapped
