

Name: _____

Deepening understanding of place value in integers

Task A: Read integers aloud and consider the context

1) Fill in the missing integers or words.

a) $300\,000 = 300$ _____ $=$ _____ hundreds $= 30\,000$ _____

b) $45\,000 =$ _____ thousands $= 450$ _____ $=$ _____ tens

c) $5\,600\,000 =$ _____ 100 thousands $= 560$ _____ $=$ _____ hundreds

d) $84\,500\,000 = 8450$ _____ $=$ _____ tens $=$ _____ millions

Task B: Write an integer described in different ways

1) Find the odd one out in each set.

a)	40 thousands	40 ten thousands	4000 tens	400 hundreds
b)	6 million	600 000 tens	60 000 thousands	60 hundred thousands
c)	1200 tens	120 thousands	12 ten thousands	1200 hundreds
d)	5780 ten thousands	5 780 000 tens	578 000 hundreds	578 million
e)	8.4 million	840 ten thousands	8400 hundreds	84 hundred thousands

2) Use all the digit cards to create:

- a) an integer with 76 hundreds
 - b) an integer with 976 hundreds
 - c) an integer with 76 tens
 - d) an integer with 90 hundreds
-
