

Exponential and fractional column headings

Task A: Place value headings expressed in exponential form

1) Fill in the blanks in the table:

Number	Exponential form
1	10^0
10	10^1
100	10^2
1000	10^3
10 000	10^4
100 000	10^5
1 000 000	10^6

2) Fill in the blanks:

$$\begin{array}{c}
 372\,500 \\
 \swarrow \quad \downarrow \quad \searrow \quad \swarrow \\
 3 \times 10^5 \quad 7 \times 10^4 \quad 2 \times 10^3 \quad 5 \times 10^2
 \end{array}$$

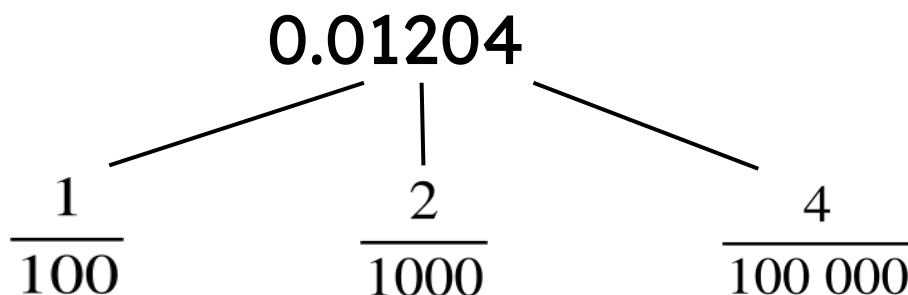

3) Write these numbers:

$$2 \times 10^3 + 5 \times 10^2 + 8 \times 10^1 + 4 \times 10^0 \quad 2584$$

$$4 \times 10^6 + 8 \times 10^5 + 3 \times 10^4 \quad 4\,830\,000$$

$$4 \times 10^6 + 8 \times 10^3 + 3 \times 10^0 \quad 4\,008\,003$$

Task B: Place value headings expressed in fractional form1) Write the value of each non-zero digit in **fractional form**

2) Write this number in decimal form.

$$4 + \frac{4}{10} + \frac{1}{100} + \frac{7}{1000} + \frac{7}{100\,000} \quad 4.41707$$

3)

300 is bigger than 30.
There are more zeros.
That's why 0.03 is
bigger than 0.3

Justify, by referring to **fractional form**, why Jun is wrong.

Write one or two sentences.

Your explanation might have included $0.3 > 0.03$ because $\frac{3}{10} > \frac{3}{100}$

Tenths are bigger than hundredths.
