

Securing understanding of plotting coordinates

1 The four areas into which the Cartesian coordinate system is divided by the x and y axes are called _____. Tick **1** correct answer

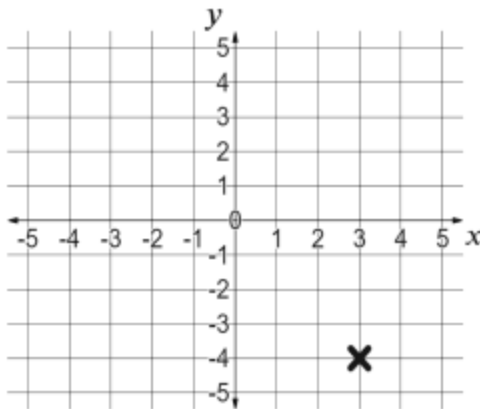

- ☒ quadrants
- ☐ quadrangles
- ☐ quarters
- ☐ quadriceps

2 Match the coordinates to the quadrant in which you would find them. Write the correct letter in each box

a	$(4, 1)$
b	$(-4, 1)$
c	$(-4, -10)$
d	$(4, -10)$

a	1st quadrant
c	3rd quadrant
d	4th quadrant
b	2nd quadrant

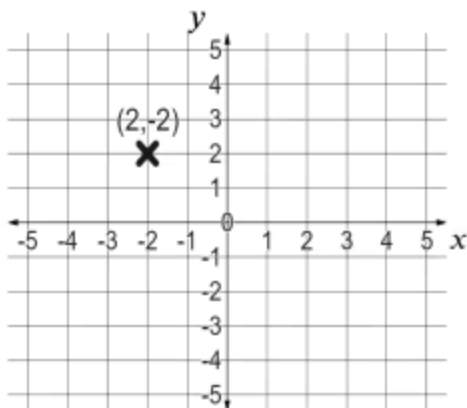

3 What is this coordinate? Tick **1** correct answer

- ☒ $(3, -4)$
- ☐ $(3, 4)$
- ☐ $(-3, -4)$
- ☐ $(-4, 3)$
- ☐ $(-3, 4)$

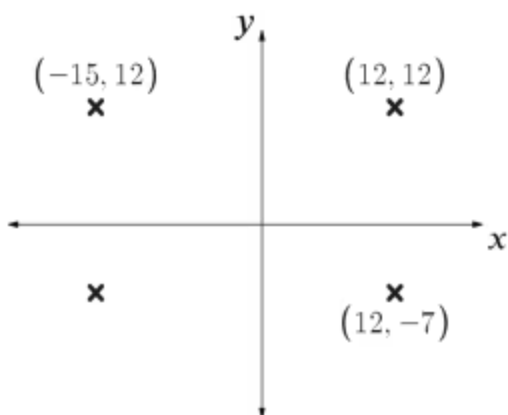

4 What's wrong with the labelling of this coordinate? Tick **1** correct answer

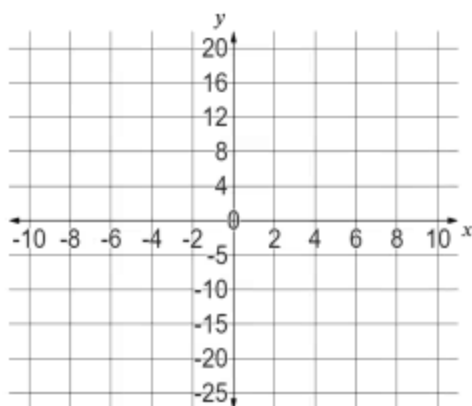

- ☐ Nothing. That's the coordinate $(2, -2)$
- ☐ Both coordinates should be -2 .
- ☒ The signs are the wrong way round on both coordinates. It should read $(-2, 2)$

5 This rectangle's sides are parallel to the x and y axes. What is the missing fourth coordinate? Tick **1** correct answer

- ☐ $(-15, -12)$
- ☒ $(-15, -7)$
- ☐ $(-12, -7)$
- ☐ $(-12, 7)$
- ☐ $(-15, 12)$

6 What is wrong with these axes? Tick **1** correct answer

- ☐ They should go up in steps of 1.
- ☐ You can't go up in steps of 4.
- ☐ Nothing. Both the x and y axes are numbered correctly.
- ☒ The y -axis does not change in equal steps.
- ☐ The x -axis does not change in equal steps.
