

Problem solving with plotting coordinates

1 Which of the rules below does the coordinate (2,-12) follow? Tick **2** correct answers

☐ $x = 2$

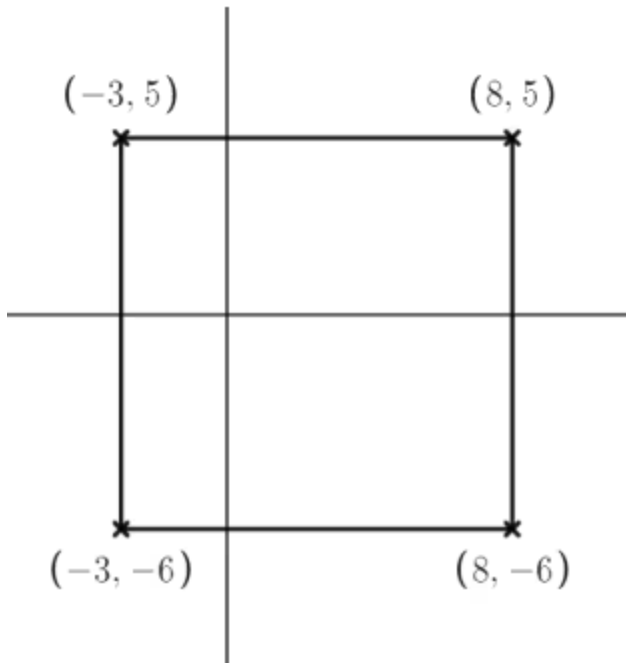

☐ $x = y$

☐ $y = x + 10$

☐ $y = 12$

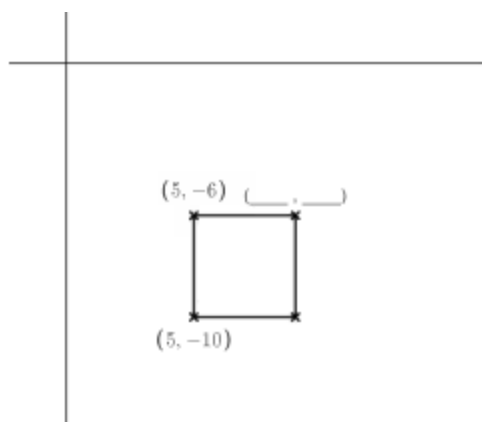

☐ $y = -12$

2 What is the length of one side of this square Fill in the blank

3 Work out the coordinate of the top right corner of this square Fill in the blank

4 Match the coordinate with the two rules it follows Write the correct letter in each box

a	(5,5)
b	(5,15)
c	(5,-5)
d	(-5,5)
e	(5,-15)

	$x = 5$ and $y = x$
	$y = 3x$ and $y = x + 10$
	$y = x + 10$ and $y = -x$
	$y = x - 10$ and $y = -x$
	$y = -3x$ $y = -15$

5 Which statements concerning intersection points are true? Tick 2 correct answers

- ☐ Any two lines will intersect
- ☐ The lines $x = 4$ and $y = 3$ intersect at (3,4)
- ☐ The lines $y = x + 15$ and $y = 2x$ intersect at (15,30)
- ☐ The lines $y = x$, $x = 4$ and $y = 4$ as intersect at (4,4)
- ☐ Two straight lines can intersect at 2 different coordinates

6 At which coordinate do the lines $y = 4x$ and $y = x - 9$ intersect? Fill in the blank
