

Problem solving with plotting coordinates

1 Which of these are properties of a square Tick **2** correct answers

- ☐ It has 4 right angles
- ☐ All sides are the same length
- ☐ It has angles of 60 degrees
- ☐ Two sides are the same length but the other two are different.
- ☐ It has 5 sides

2 Jun marks the coordinate (3,4) on a set of axes with a cross. What word best describes what he has done? Tick **1** correct answer

- ☐ plotted
- ☐ drawn
- ☐ estimated
- ☐ generalised
- ☐ multiplied

3 Lucas has put -3 and 4 on a number line. What calculation will give him the distance between these numbers on his number line? Tick **1** correct answer

- ☐ $-3 + 4$
- ☐ $-3 \div 4$
- ☐ $4 - (-3)$
- ☐ $4 - 3$
- ☐ $-4 + 3$

4 Calculate $(-8) - (-10)$ Fill in the blank

- 5 Match the coordinate with the equation for the line it will lie on Write the correct letter in each box

a	(2,3)
b	(3,6)
c	(-3,-3)
d	(5,-5)
e	(-2,-3)
f	(-3,4)

	$y = -3x - 5$
	$y = -x$
	$x = 3$
	$y = x$
	$y = 3$
	$y = 2x + 1$

- 6 These three coordinates are plotted on an axis. (-10,3) (-8,3) (-10,1). What coordinate needs to be plotted to form a square? Fill in the blank
