

Equally likely outcomes

1 Match each key words with its definition. Write the correct letter in each box

a	trial
b	outcome
c	sample space
d	likelihood

b	a result of a trial
c	all the possible outcomes of a trial
d	describes the chance that a particular event will occur
a	a single predefined test

2 Complete the following sample space for the outcomes of the spinner. $\xi = \{A, I, L, R, \underline{T}\}$. Fill in the blank

3 In which spinners are the outcomes 'win' and 'lose' equally likely? Tick 2 correct answers

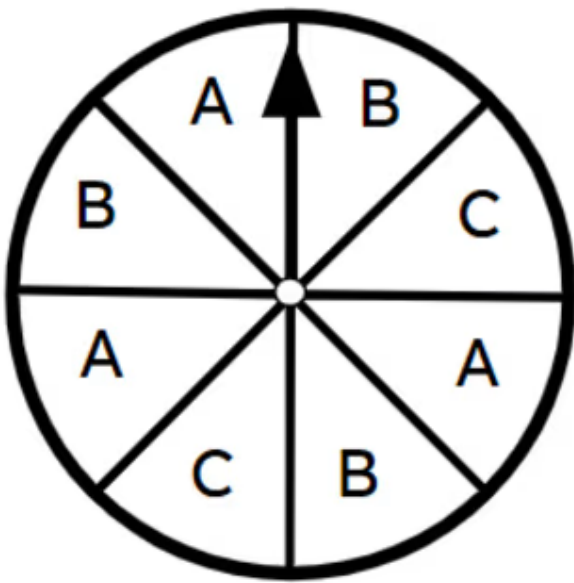

☐

☒

☒

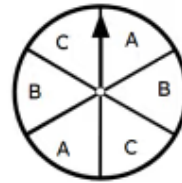

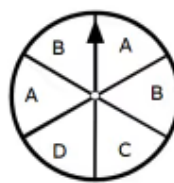

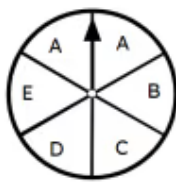

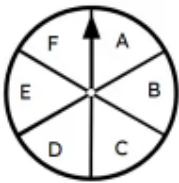

☐

4 Which outcomes are equally likely in this spinner? Tick **1** correct answer

- ☒ A and B
☐ A and C
☐ B and C

5 In which spinners are all the outcomes equally likely? Tick **2** correct answers

6 A regular six-sided dice is rolled once. In which sample space are the outcomes equally likely? Tick **1** correct answer

- ☐ $\xi = \{\text{factor of 6, not a factor of 6}\}$
☐ $\xi = \{\text{multiple of 3, not a multiple of 3}\}$
☒ $\xi = \{\text{odd, even}\}$
☐ $\xi = \{\text{square number, not a square number}\}$
