

Problem solving with possible outcomes

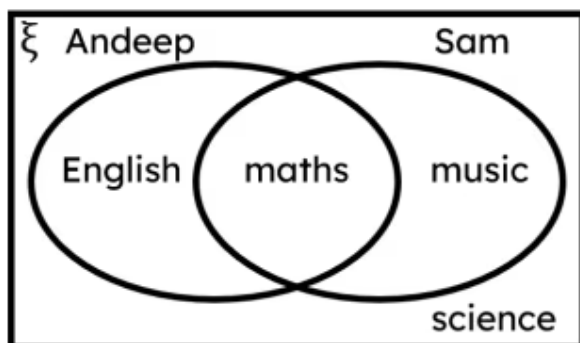

- 1 The Venn diagram shows the sample space $\xi = \{8, 81, 144, 201\}$. Match each region to the correct outcome. Write the correct letter in each box

a	a
b	b
c	c
d	d

b	144
a	8
d	201
c	81

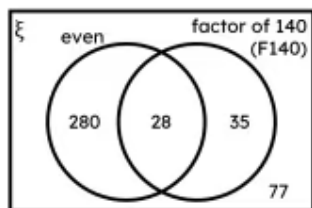

- 2 The Venn diagram shows a selection of subjects that Andeep and Sam enjoy. Which of these statements is true for science? Tick **1** correct answer

- ☐ Andeep likes science, but Sam does not like science.
- ☐ Both Andeep and Sam like science.
- ☐ Andeep does not like science, but Sam likes science.
- ☒ Neither Andeep nor Sam like science.

- 3 Both the Venn diagram and outcome table represent the same two events from a trial. Match each lettered outcome from the outcome table to the correct outcome from the Venn diagram. Write the correct letter in each box

	even	odd
F140	a	b
not F140	c	d

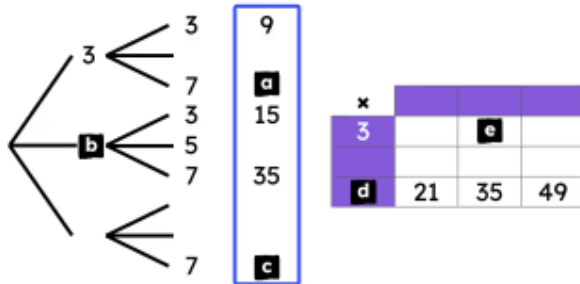

a	a
b	b
c	c
d	d

a	28
d	77
b	35
c	280

- 4 Trial: spinning this spinner once. Event 1: even number. Event 2: cube number. Which outcomes should be written inside the box? Tick 2 correct answers

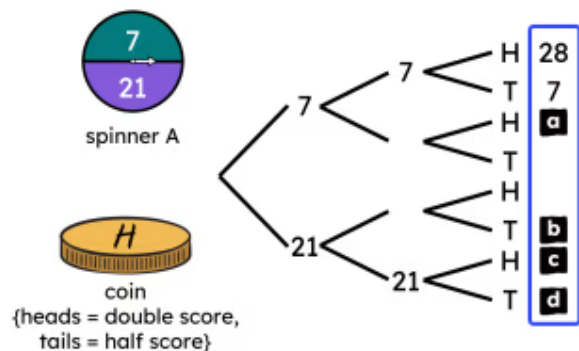

- 5 Trial: a spinner is spun twice, with the two results multiplied together. Both incomplete diagrams represent the same trial. Match each letters to the correct outcome. Write the correct letter in each box

a	a
b	b
c	c
d	d
e	e

<i>a</i>	21
<i>b</i>	5
<i>e</i>	15
<i>d</i>	7
<i>c</i>	49

- 6 Trial: Spinner 1 is spun twice. The outcome of each spin is added together. This incomplete outcome tree shows all outcomes of this trial. Match each letter to its value in the sample space. Write the correct letter in each box

a	a
b	b
c	c
d	d

c	84
d	21
b	14
a	56
