

Non-equally likely outcomes

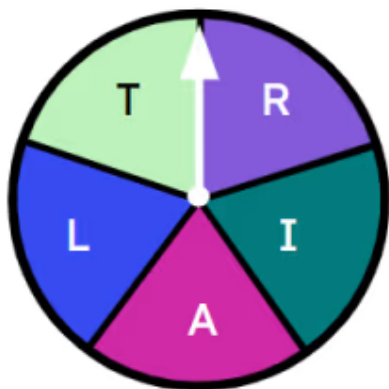

1 A _____ is a single predefined test. Tick **1** correct answer

- ☐ likelihood
- ☐ outcome
- ☐ sample space
- ☒ trial

2 What is an 'outcome'? Tick **1** correct answer

- ☒ a result of a trial
- ☐ a single predefined test
- ☐ the chance that a particular event will occur.

3 Complete the following sample space for the outcomes of the spinner. $\xi = \{A, I, R, T, \underline{L}\}$.
Fill in the blank

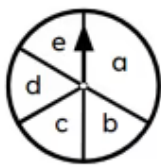

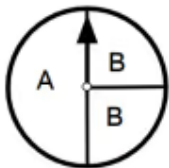

4 A regular six-sided dice is rolled once. In which sample space are the outcomes equally likely? Tick **1** correct answer

- ☐ $\xi = \{\text{cube number, not a cube number}\}$
- ☒ $\xi = \{\text{factor of 10, not a factor of 10}\}$
- ☐ $\xi = \{\text{multiple of 1, not a multiple of 1}\}$

5 In which spinner are all the outcomes equally likely? Tick 2 correct answers

6 A regular six-sided dice is rolled once. Which outcome would be equally likely to rolling a multiple of 3? Tick 1 correct answer

rolling an even number

rolling a factor of 12

rolling a multiple of 4

rolling a square number
