

The scale of likelihoods

1 An outcome is _____ if there is no possibility that it can happen. Tick **1** correct answer

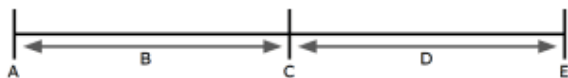

- ☐ certain
- ☐ even chance
- ☒ impossible
- ☐ likely
- ☐ unlikely

2 Which statement describes the meaning of 'even chance'? Tick **1** correct answer

- ☐ An outcome has less chance of happening than not happening.
- ☒ An outcome has the same chance of happening as not happening.
- ☐ An outcome has a greater chance of happening than not happening.

- 3 Match the words with their positions on the scale of likelihoods. Write the correct letter in each box

a	A
b	B
c	C
d	D
e	E

a	impossible
d	likely
b	unlikely
e	certain
c	even chance

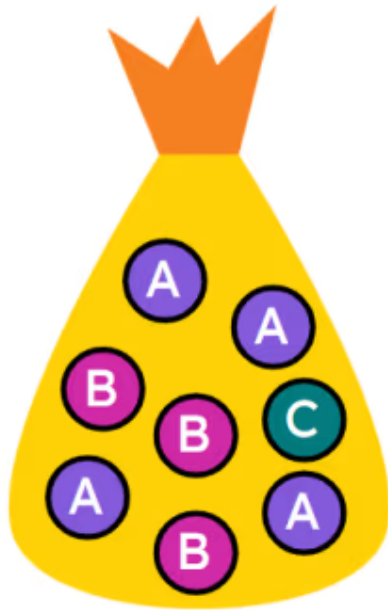

- 4 Match each event with the term that describes their likelihood. Write the correct letter in each box

a	Rolling 1,2,3,4 or 5 on a 6-sided dice
b	Rolling a 6 on a 6-sided dice
c	Rolling an odd number on a 6-sided dice

a	likely
c	even chance
b	unlikely

- 5 A bag contains counters that are each labelled with a letter from A to C. One counter is chosen at random from the bag. Which term describes the likelihood of choosing the letter 'A'? Tick **1** correct answer

- ☐ certain
- ☒ even chance
- ☐ impossible
- ☐ likely
- ☐ unlikely

- 6 A regular six-sided dice is rolled. Starting with the least likely, sort the events in increasing order of likelihood. Use numbers to show the correct order

1	rolling a negative number
6	rolling an integer
4	rolling a prime number
3	rolling a square number
5	rolling a factor of 6
2	rolling a multiple of 6
