

Using two-way tables to display outcomes for two events

1 An outcome table is a table that shows _____ of the possible outcomes. Tick **1** correct answer

- ☒ all
☐ none
☐ some

2 This outcome table shows all the possible outcomes for which spinner, when spun twice? Tick **1** correct answer

	A	B	C
A	AA	BA	CA
B	AB	BB	CB
C	AC	BC	CC

☐

☐

☒

☐

- 3 Two teams are playing a football match. The table lists the outcomes when each team scores 1, 2 or 3 goals. Which outcome table is completed from team 1's perspective?
Tick **1** correct answer

		Team 1		
		1	2	3
Team 2	1	draw	lose	lose
	2	win	draw	lose
	3	win	win	draw

☐

		Team 1		
		1	2	3
Team 2	1	draw	win	win
	2	lose	draw	win
	3	lose	lose	draw

☒

		Team 1		
		1	2	3
Team 2	1	draw	lose	win
	2	win	draw	lose
	3	lose	win	draw

☐

- 4 A spinner is spun. The outcome table shows two events; prime numbers and odd numbers. What is the sample space for the trial? Tick **1** correct answer

	prime number	not a prime number
odd number	3 7 5	1 9
not an odd number (even)	2	4 6 8

☐

{2, 3, 5, 7}

☐

{1, 3, 5, 7, 9}

☒

{1, 2, 3, 4, 5, 6, 7, 8, 9}

☐

{1, 2, 3, 4, 5, 6, 7, 8, 9, 10}

- 5 This two-way table shows shoe size and year group in a school. The number of students who are not in year 7 and have size 5 feet is 266. Fill in the blank

	size 5	not size 5	total
year 7	93	45	138
not year 7	266	687	953
total	359	732	1091

- 6 The missing frequency in this two-way table is 29. Fill in the blank

	small	not small	total
yellow	16	38	54
not yellow		17	46
total	45	55	100
