

Comparing representations of outcomes for two events

1 Which of these are helpful when trying to systematically write down all outcomes for a two-stage trial? Tick **3** correct answers

- ☒ list
- ☒ outcome table
- ☒ outcome tree
- ☐ Venn diagram

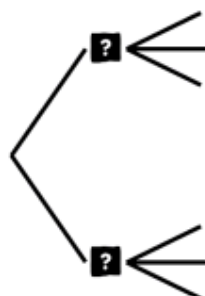

2 Both the outcome table and outcome tree represent the same two-stage trial. Which outcomes go in the two locations marked by a question mark? Tick **2** correct answers

	A	B
1	1A	1B
2	2A	2B
5	5A	5B

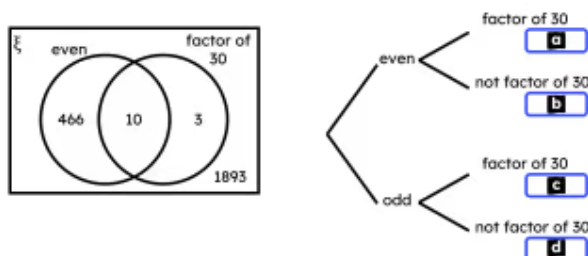

3 Which statements are correct for this outcome table and outcome tree? Tick **3** correct answers

	A	B
1	1A	1B
2	2A	2B
5	5A	5B

- ☒ A and B are the only two outcomes for one stage of this trial.
- ☐ The event looks at only odd numbers.
- ☒ The first layer of branches represent only two outcomes.
- ☒ Each group in the second layer of branches represent three outcomes.
- ☐ All the outcomes can be placed on the outcome tree in any order.

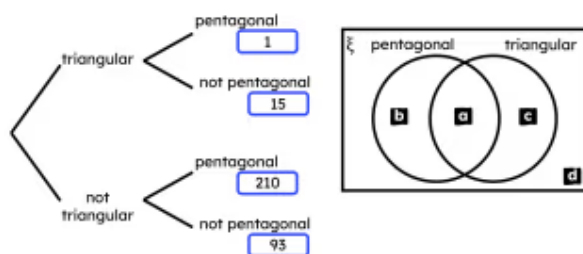

- 4 Both the Venn diagram and outcome tree represent the same two events from a trial. Match each missing outcome from the outcome tree to an outcome from the Venn diagram. Write the correct letter in each box.

a	a
b	b
c	c
d	d

d	1893
c	3
a	10
b	466

- 5 Both the outcome tree and Venn diagram represent the same two events from a trial. Match the missing outcome from the Venn diagram to an outcome from the outcome tree. Write the correct letter in each box.

a	a
b	b
c	c
d	d

d	93
c	15
a	1
b	210

- 6 Trial: Alex will spin this spinner and flip this coin, and then write the product of the two outcomes in the sample space. Which of these are the missing numbers on the spinner? Tick 4 correct answers

spinner

coin

$$\xi = \{0, 3\}$$
