

Checking listing possible outcomes

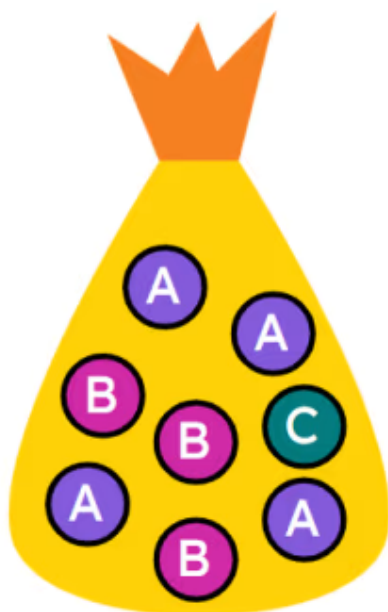

1 When listing outcomes _____, they are listed in such a way as to ensure all outcomes are recorded. Tick **1** correct answer

- ☐ haphazardly
- ☐ randomly
- ☒ systematically

2 A coin is flipped twice. Complete the sample space $\xi = \{HH, HT, TH, \underline{TT}\}$ Fill in the blank

3 A coin is flipped three times. Which outcome is missing from the following sample space? $\xi = \{HHH, HHT, HTH, HTT, THH, THT, \underline{TTH}, TTT\}$ Fill in the blank

4 A counter is taken from the bag. Its letter is noted and then it is placed back into the bag. A counter is taken from the bag again. Which is a correct sample space for this trial? Tick **1** correct answer

- ☐ $\xi = \{AA, AB, BA, BB, BC, CA, CB, CC\}$
- ☐ $\xi = \{AA, AB, AC, BA, BB, BC, BB, CA, CB, CC\}$
- ☒ $\xi = \{AA, AB, AC, BA, BB, BC, CA, CB, CC\}$

5 In a rugby match, a team can either win (W), lose (L) or draw (D). A team plays two matches. Which outcome is missing from the following sample space? $\xi = \{WW, WL, WD, LW, LL, DW, DL, DD\}$ Fill in the blank

LD

6 There are two trials. In Trial 1, a spinner with {A, B, C} is spun twice. In Trial 2, a spinner with {A, B} is spun three times. Which statement is true? Tick **1** correct answer

- ☒ The total number of possible outcomes in Trial 1 is greater than in Trial 2.
- ☐ The total number of possible outcomes in Trial 1 is less than in Trial 2.
- ☐ The total number of possible outcomes in Trial 1 is the same as in Trial 2.
